

I am

I'm trying to

But

Because

Which makes
me feel

customer

Buy a product

It is difficult to
choose the suitable
products

There is no steady
need for purchase a
products (Dress
,jewellery etc..)

There is no
application that
provides a proper
communication
between seller to
buyer so customers
feel badly

Know the
original price
and want to
buy a Product

It is difficult to
communication
between user to
vendor

Although those application
helps finding a right products
to users but the ease of
communication with those
users in not prompt

Customer feel
afraid about the
products is
original or fake

Sellers of different e-
commerce sites selling
a same products with
difference in price

Different contracts
with supplier and the
price are determined
by the different retailer

Grief and sad
